

FUME-FIX

Solves your Laser cutting and Welding fume extraction problems

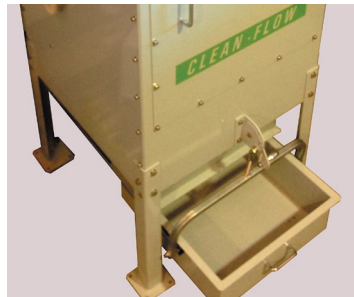

**Compact, Affordable and Efficient
FUME-FIX is the answer!**

FUME-FIX is built around high efficiency pleated 'PTFE' filter cartridges with 0.3 micron filter capability. 1/3000th of a millimetre!
These special Teflon coated 'fire retardant' filters trap fume and fine particles down to this size with 99.5% efficiency.

**The 12 Pleated Filters deliver 24 sq metres of
filter in a very compact package.
18 and 30 filter versions available for
higher volume applications.**

Automatic 'on-line' cleaning of the filter banks every 30 seconds via reverse pulse compressed air.

**Rugged steel waste bin system
captures particles and can be
emptied and refitted in a flash.**

Unique 'spark suppression' system at intake.

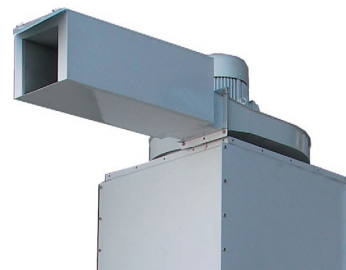

Pressure gauge to monitor filter condition.

Industrial silencer included

**Combine with Micronair Fume arms for
Welding or connect to the extraction
outlet of your Laser cutter - either way
Fume problems are fixed!**

**Your new FUME-FIX is very solidly
built here in Australia to tough
compliance standards and protected
by the MICRONAIR warranty**
